**Highlights for this quarter –**

These 3 youth used TANF Work Experience Funds to assist in funding their Summer 2018 mission trips to Israel and Puerto Rico. Tessa Switala, Rachel Howard, and Joshua Howard spent time in Puerto Rico clearing debris, repairing and building roofs on multiple homes as well as building a wheelchair ramp. This group also went to multiple nursing homes and handed out water and rice to those who had been ravaged by the hurricanes that hit Puerto Rico. This is just some of the things this group was involved in. Hannah Switala (not pictured) and Joshua and Rachel, also used much of their resources to go on a trip where they invested in understanding the complexities of the Middle East, understanding the culture, and to help facilitate dialog while teaching young people English and interacting with the many different diverse cultures that are represented in Israel. The TANF program made these opportunities possible.

The WIOA program works hard to assist those who receive training. Three individuals from the Clearfield area have chosen to enhance their training and work skills. Stephanie Kline- Nelson, Bonnie Mathews, and Daniel Corman attended the heavy tractor trailer program at Clearfield Career and Technology Center. Each of them have passed their CDL licensing process and will continue to earn their road time required to graduate from the program. Each of them are looking at various employers in our area as their time with the training continues.

Matt Oswalt was enrolled in the EARN program and since then, Matt has secured subsidized employment with BBU as a Roustabout starting in the coming weeks. Since his time in EARN, he was able to make significant improvements to his resume and continues to display solid job habits such as punctuality and a willingness to work which will help him greatly in the future. Matt has also displayed a willingness to help in area communities as he has done Community Service work with Mercy Hill Ministries in Blairsville helping the church relocate. He has been helping them move and unpack along with doing basic construction, painting and plumbing work.
