

### **1<sup>st</sup> Place – Trisha Kreydt, KTH Architects, Inc.**

My internship at a local architecture firm provided opportunities to work on projects throughout North Central Pennsylvania. One of my assignments was to create a digital model for a local school library. To ensure that I worked in the correct scale, I always imagined myself living in the model.

### **2<sup>nd</sup> Place – Kara Detsch, Dr. Mary Reed DaCanal Optometry**

My future is clear because of my opportunity as an intern with Dr. DaCanal and her staff this summer. From interacting with patients to operating optometric equipment, my internship enabled me to “see” how a business in small town PA can thrive. “Eye” hope to establish my own someday!

### **3<sup>rd</sup> Place – Makayla Belser, The Learning Center**

We enjoyed this sunny day in PA hard at work making lives for these seeds, while sprouting into ours. While I taught children about plant life, they most importantly taught me this summer that you do not always need to be in the classroom to learn.
