Workforce Solutions

for North Central PA

Engaging those seeking careers!

Those seeking a rewarding new career are invited to take advantage of this comprehensive, entry-level training developed in partnership with local manufacturers, Workforce Solutions of North Central PA and Penn State DuBois.

This 71-hour training has been created to provide the basic level of knowledge and skills for an entry level position with a metal fabricating facility or secondary department in a powder metal manufacturer.

Curriculum includes:

- Industrial Math
- Geometry
- Metrology
- Blueprint Reading
- GD&T Basics
- Intro to CNC Lathe
- Machine Functions
- Intro to Programing
- CNC Lathe Set-up
- Troubleshooting

This program is made possible through funding and support of Workforce Solutions for North Central PA and their Manufacturing Training to Career Grant from the Department of Community and Economic Development.

Upon finishing the 71-hours of training, students will receive a certificate of completion from Penn State.

Instructors for this training work in local manufacturing and have helped create the curriculum along with some of the leading metal fabricating companies in our region.

No cost to participants

Limited seating available
